

1. India Pushes Responsible AI Adoption in Healthcare

- Union Health Minister **J. P. Nadda** has released a knowledge paper on “**AI in MedTech**”, outlining priorities for responsible use of artificial intelligence in healthcare.
- The focus includes:
 - AI-enabled medical devices
 - Diagnostics
 - Clinical decision support
 - Patient monitoring
 - Data and regulatory governance

Healthcare Insight: India is moving toward structured and responsible deployment of AI rather than treating AI simply as an experimental technology.

2. FICCI Highlights Prevention-First AI Healthcare Model

- A new healthcare publication launched by **FICCI** examines the opportunities and limitations of AI in healthcare.
- Industry leaders emphasised a **prevention-first, patient-centric digital health ecosystem**.
- AI applications are expected to increasingly support:
 - Early disease detection
 - Risk prediction
 - Personalised healthcare
 - Clinical decision-making

Clinical Insight: The greatest potential of AI may lie in identifying health risks earlier and supporting preventive intervention.

3. Telangana Forms Dedicated Healthcare Panel to Drive Digital Transformation

- **FICCI Telangana** has launched a healthcare panel in Hyderabad.
- The panel will advise on:
 - AI-enabled preventive healthcare
 - Digital transformation
 - Healthcare infrastructure
 - Medical tourism
 - Industry–government collaboration

👉 **Healthcare Impact:** The initiative reflects increasing state-level emphasis on technology-driven healthcare delivery and preventive medicine.

4. India's Medical Device Industry Targets Major Long-Term Expansion

- India's medical-device industry is increasingly positioning itself as a major global manufacturing and innovation hub.
- Industry projections indicate a potential **\$250-billion medical-device ecosystem by 2047**, compared with an estimated current market of around \$14 billion.
- Priorities include:
 - Domestic manufacturing
 - Innovation
 - Research and development
 - Export competitiveness

👉 **MedTech Insight:** Building domestic capability in medical devices could reduce import dependence and improve access to advanced healthcare technologies.

5. Emcure Pharmaceuticals Receives USFDA Establishment Inspection Report

- **Emcure Pharmaceuticals** has received an Establishment Inspection Report (EIR) from the US FDA for its **Sanand facility**.
- The development is relevant to the company's US-market manufacturing and regulatory activities.

👉 **Pharma Industry Insight:** USFDA inspections and regulatory clearances remain important indicators for Indian pharmaceutical companies supplying medicines to international markets.

6. Hospital–Insurer Dispute Resolution Mechanism Being Considered

- The General Insurance Council has indicated that a **hospital–insurer panel** may be established to address disputes involving health insurance claims.
- The proposed mechanism could help address disagreements involving:
 - Claim settlements
 - Hospital bills
 - Treatment costs
 - Insurer–hospital communication

Healthcare Insight: A structured dispute-resolution mechanism could reduce delays and improve transparency for patients undergoing hospital treatment.
